## I EVE

### Facial Skincare Device for Professional Aestheticians.

EVE is a fundamental facial skin-care device for professional aestheticians. It exfoliates and cleanses the pores via hydro-microdermabrasion, improves skin elasticity, and removes wrinkles with microcurrent electrotherapy.

Reduction of fine lines and wrinkles  
Increased collagen and elastin fibers in the skin

Improved skin, cell, and muscle blood circulation  
Increased cell permeability to help cosmetic product absorption

Hydration  
Sebum control

Acne control,  
Blackhead extraction

Microcurrent electrotherapy technology increases the production of ATP and protein, which plays an important role in cellular energy metabolism, using micro-electric currents hardly felt by the human body, promoting skin cell metabolism and lymphatic drainage. Pain relief and skin elasticity induction technology

## I Company Introduction

### Company Name : WEERO

Weero is an innovative company consisting of beauty industry experts specializing in the aesthetic and medical spa industry. Weero's R&D team consistently develops and pursues new technology for the world's leading technology. Weero's production team follows strict quantity control to ensure we manufacture devices in the correct way and with guaranteed quality that provides effective, stable, and safe devices to our customers.
