SILLA ENGINEERING is a manufacturer of automobile press die and mold bases for injections and has persistently worked to develop new technologies, train talented individuals, and bring about innovations in cost control. We always innovate ourselves to make customers satisfied based on "Cumulated technologies for 30 years and Confidence of quality."

I Company Introduction

Company Name : Silla Engineering Co., Ltd.

SIILLA ENGINEERING CO., LTD was established in 1987 as a joint venture between Silla Corporation and HIROTEC. We are a top-level manufacturer of press die tools for automobile manufacturing, mainly for automotive skins, moving parts, and structure parts. Automotive press die tools are our main business, and we have several sales references for different global customers, such as Hyundai – Kia, Renault – Nissan, Stellantis, and Maruti Suzuki.
