I PIXX 1717 Flat-panel X-ray Detector

Complete your roll labels digitally on the table!

PIXX 1717 is a flat-panel digital x-ray detector with largest image coverage of 17" by 17" for every application with features not found on any other image devices. PIXX 1717 is equipped with not only CsI but also premium Gadod scintillator for cost effective product line and it allows high X-ray sensitivity and high image quality. Thanks to 2nd generation AED technology which makes continuous and stable image acquisition without any loss of X-ray signal. On-board storage and Mobile Viewer allow users to use DR detector as like CR imaging plate. The detector provides other features that you love.

FEATURES

Stand-alone Use Without - workstation, detector works with x-ray source in portable & mobile environment

AED PLUS - Second generation of continuous & accurate AED provides faster and efficient image acquisition

On-board Storage - Protect any data loss by saving up to 100 images on the detector

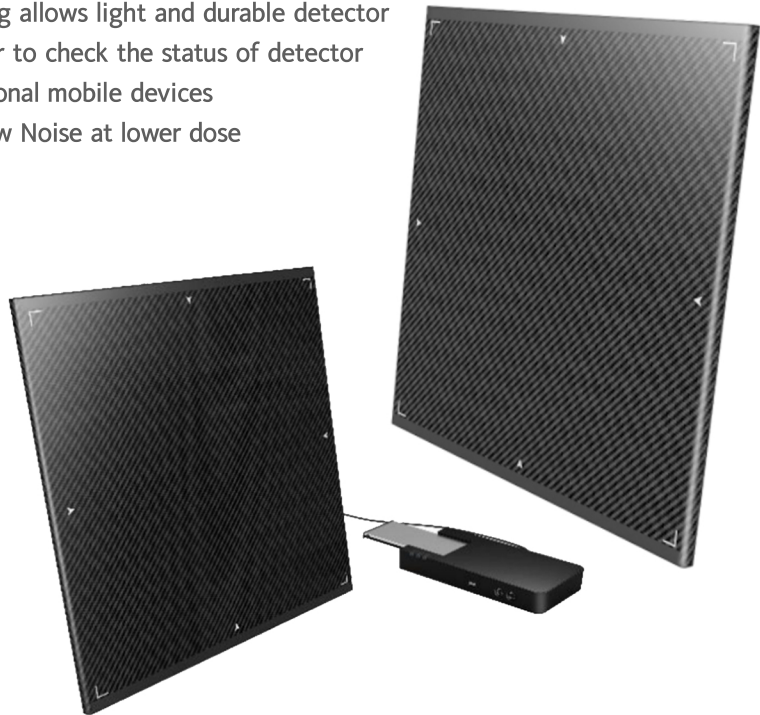

One-piece Carbon Body - With largest image coverage 17"x17", less than 3~5 second

Faster Image Acquisition - Full carbon fiber housing allows light and durable detector

OLED Display for Status - OLED window helps user to check the status of detector

High Image Quality - Instant Viewer from any personal mobile devices

Web Viewer for Mobile Phone - High SNR and Low Noise at lower dose

Product Information	
Dimensions	461 X 460 X 15 (mm)
Weight	2.6kg / 3.0kg(With battery)
Application	General Radiography
Image Size	17 X 17 inch
Sensor Pixel	3,072 X 3,072 (9.4M pixels)

I Company Introduction

Company Name : PIXXGEN Coporation

PIXXGEN has offered features like Automatic Exposure Detection, Automatic Calibration Control and many other truly useful features. Digital Radiography is our specialty. PIXXGEN is a pioneer of detector technology, which has recently become an industry standard
