I Drain Master Series

Filtration Type Oil-Water Separator

The YUSOO Breaker is a nonelectric oil-water separator. It dramatically reduces the high cost of processing condensate and provides satisfactory results in improving work efficiency and corporate imaging.

The YUSOO Breaker Series features the best functional products made from dedicated research and development. Customers are satisfied with the convenience and efficiency of the YUSOO Breaker.

FEATURES

- It can respond to compressor expansion simply by replacing the filters.
- Replacement filters can be replaced easily because the filter is installed externally.

YUSOO 8

YUSOO 30

YUSOO 100

YUSOO 15

YUSOO 42

I Company Introduction

Company Name : EnE SYSTEM CO.,LTD.

Technology to the first person. To think of the environment. We have been working on the efficient treatment of condensation water generated in an air compressor system and are producing an auto drain trap that is both economical and reliable. Using advanced techniques and knowledge, we also developed an oil-water separator that serves as a processing unit for contaminated condensate

Manager : Luna Kwon (overseas sales)
