I REVITRANE

Cross-linked Hyaluronic Acid Filler

Dermal fillers are gel-like substances that are injected beneath the skin to restore lost volume, smooth lines and soften creases, or enhance facial contours. Revitrane is maximized advantage of HA filler, safe monophasic type filler with minimal crosslinking agent(BDDE).

Revitrane Premium

Premium is slightly viscous and high elastic gel type, so it is suitable for most of treatment areas for volumizing

Revitrane Volume

Volume is viscous gel texture to restore volume as it attracts and keeps moisture in the skin. Volume has high expansion rate, so it is suitable for volumizing

Revitrane Classic

Classic is designed to be treatment of the areas like lips or fine lines for expressing natural volume. It is suitable for areas that require natural volume due to less swelling.

Revitrane HA20 Skin Booster

Skin Booster has lower viscosity and elasticity, and is suitable for improving fine wrinkles and overall moisturizing & elasticity of the face.
