Product

⊕ MK300Lmax

- 01 The MK300Lmax is a sequential intermittent pneumatic system. Dynamic air pressure provided by 2 channels and 4 ports is applied to various body types to increase user satisfaction. This is a method that pressurizes the sleeve composed of 6 air chambers sequentially from 1 to 6 steps to push up the blood in the toe area. With this product, customers can be satisfied by effectively discharging stagnant lymph such as dissolved toxins, waste products, and fat cells through lymph circulation in professional slimming
- 02 · Use of durable domestic motors · 3 optimized modes
· 2 channel 4 port configuration · Detailed pressure and time can be set
· Intuitive user settings
- 03 · Leg sleeves (L, XL, XXL) · Waist sleeve (FREE SIZE) · single tubing
· Arm sleeve (FREE SIZE) · full body sleeve · remote switch

⊕ LX9max

- 01 · Use of durable domestic air motor · SKIP care for damaged areas
· Friendly user interface · Choose from a variety of sleeves such as legs, arms, and waist
· Intensive compression care on the desired area
- 02 · Leg sleeves (L, XL, XXL) · Waist sleeve (FREE SIZE) · single tubing
· Arm sleeve (FREE SIZE) · center sleeve · double tubing
- 03 · Leg sleeves (L, XL, XXL) · Waist sleeve (FREE SIZE) · single tubing
· Arm sleeve (FREE SIZE) · center sleeve · double tubing
