I TAN Nose Hair Trimmer

The Masterpiece Worth 60 Years of Experience and Tradition

We are so proud of our 60-year manufacturing experience in Korea. We independently develop, manufacture, and sell high-quality metal products, so you can rest assured that our products are built with excellent craftsmanship. For more personal care, manicure, and pedicure products, please visit our shop, ROYAL.

BATTERY-FREE. You no longer need to struggle pulling out the batteries for a security check before your flight. This device does not require any battery. The patented mechanism allows you to trim comfortably with the twelve dual-edged blades technology.

Cutting or pulling your hair with scissors or tweezers can hurt or irritate your skin. The ROYAL nose hair trimmer, TAN, is made with precision rotary cutters so that the blades do not touch the skin.
