ANNULAR CUTTERS

애놀러커터

Made in Korea

- Use high quality raw material from HITACH
- Faster than twist drill (3 times)
- Supreme portability using magnetic drill m/c
- Realizing high out-of-roundness
- Able to drill holes which are difficult to do accurately at the Ship, Bridge etc.
- Excellent performance in stainless, copper and difficult-to-cut-materials
- Maxium processing size
Outside dia : Ø250mm, Depth : 300mm

SHARK CUT

샤크컷

Made in Korea

- Faster and easier than conventional twist drill and hole saw
- With precision ground, SHARK CUT produce burr-free holes
- 13mm chuck is accepted by small size arbor
- Lighter drill weight compare with conventional drill for same size hole making

HOLE CUTTER

홀커터

Made in Korea

- The hole cutter is used mainly with focus on thin materials.
- Its durability is excellent on the strength of attachment of Sandvik-tip
- It should be used by adjusting velocity according to the size of the external diameter
- Attachment of Sandvik-tip
- It is much used for stained steel plate and iron plate
- Wood, P.V.C., and bakelite etc. are suitable
- Patent registration with double-edged patent No.10-2147116

BI-METAL HOLE SAW

바이메탈 홀쏘

Made in Korea

- Long life cycle and powerful cutting on the strength of Thff Tooth Saw Blade Composition
- General arbor is available
- It's a hexagonal type or triangular type and power drill is installed at it
- It's compatible with other products
