I CAFU-02-10(Flexible Hose type Air Purifier)

Portable Toxic Gas Air Purifier

The Portable Toxic Gas Air Purifier effectively discharges the source of contamination when placed beside the table in the laboratory, research room, or soldering room.

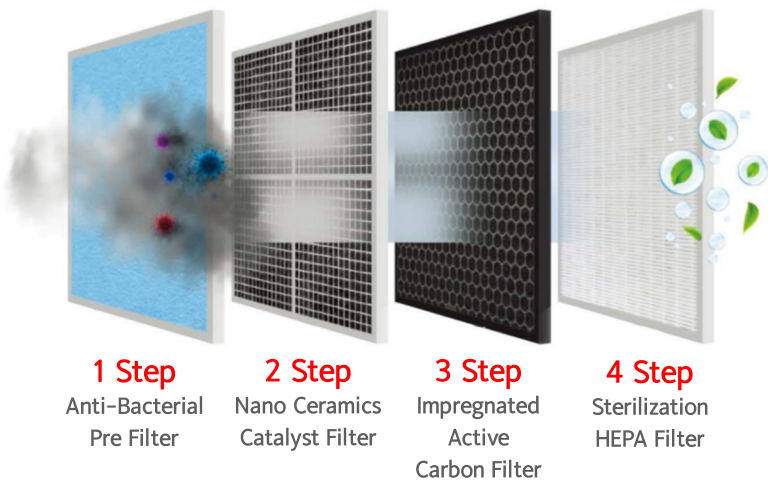

Can easily be moved to an area needing exhaust without being fixed to its installed spot.

Effectively purifies and discharges pollutants generated at laboratories, soldering workshops, etc.

Available at your desired location without restrictions on installation location, enabling efficient use with its flexible hoses and arm hood.

4 Steps Filter Structure

Product Info	
Size	420*420*705(mm)
Weight	36kg
Material	Plate 1.2t with Epoxy Powder Coated
Noise Level	≤55dB
Air Speed	9 ~ 13m/s
MOQ	5ea

I Company Introduction

Company Name : CHEONGWOO C&T

Since its establishment in 2014, Cheongwoo C&T has been steadily developing and manufacturing harmful and toxic gas purifiers. We keep supplying various products that can improve the working conditions and living environment of workplaces that inevitably generate harmful gases. Cheongwoo is a technology-oriented company that holds various patents, including certifications from KC, CE, ISO, etc.
