## I TOGUARD

### All-in-One Chemical Absorbent & Neutralization Agent

The TOGUARD Chemical Absorbent and Neutralizing Agent offers the best protection to researchers, neutralizing up to 2/3s of the toxic gases and fumes that are generated during spills. TOGUARD simplifies the spillage response process and greatly reduces the time it takes to treat and clean up spills, minimizing injuries, damage to the surroundings, and pollution. Spills are safely absorbed and neutralized, preventing further bodily injury and property damage from fire, explosions, and pollution. TOGUARD is manufactured from ingredients that are used in food products and cosmetics and are proven safe for humans. TOGUARD is extremely absorbent, even in small quantities.

Particle SEM Image	TOGUARD solidifies into easy to clean-up gel
Heat Comparison	TOGUARD releases significantly less heat than the competition during the neutralizing process
Super Absorbent	Ionized and provides rich magnesium ions and hydrogen
Product Features	Excellent liquid absorption capacity Acid and basic properties can be distinguished Save on waste costs due to high economic efficiency Increase efficiency Use of eco-friendly materials
Available types	Comprehensive neutralizer, Acid & base neutralizer, Fume & VOC neutralizer

## I Company Introduction

### Company Name : GT SCIEN Co., Ltd

GT SCIEN was established in 2008 and provide laboratory EHS solutions based on our toxic gas purification technology and IoT management platform that transform laboratories into environmentally-friendly, safe and healthy work environments for researchers. TOGA® stands for Toxic Gas Clean Air System Many people who work in laboratories, factories and other workplaces dealing with chemicals are exposed to toxic gases.
