## I INCONTRO STOCKINGS

### UV Protection Sports Stockings

The first product in the world with a UV-coated fabric, for even greater protection against UV rays UPF 50+ (UVA 99.9%,UVB 99.9%) We have used functional fabric. TACTEL fabric (certified product from INVISTA), a premium nylon brand with a soft texture, clinging to the body comfortably and smoothly. Fire-resistant and moisture absorbing, 20% lighter than other fabric, and has about 7 times faster drying speed than cotton materials, LYCRA fabric (certified product from INVISTA) Developed as a premium elastic material by INVISTA, the largest producer of fabric materials in the world, LYCRA boasts of superior durability and elasticit

**4-WAY STRETCH** wraps around comfortably even around even thinner wrists and creates a compressed and smooth leg line.

**NON-RUN construction** prevents fraying, even around holes, and ensures durability over a long time.

**Elastic compression** helps adjust body line and reduce leg swelling.

**Its seamless construction** prevents impressions and abrasion for even better comfort.

**The stirrup construction** offers stability and comfort and prevents the hem from rolling up.
