I Pure Whitenol Serum

Discover an incredibly beautiful skin after 8 weeks

Pure Whitenol Serum is the ultimate remedy for melasma and uneven skin tone. It has a strong melanin-inhibiting effect of Whitenol® (Liposome-encapsulated 4-n-Butylresorcinol (KR Patent No. 0751883)). With proven effects through years of clinical trials, this product is endorsed by dermatologists worldwide.

Pure Whitenol Serum cleans and purifies the dull skin caused by melasma and blemishes, and skin aging caused by pollution and various environmental stressors.

The “triple” whitening agents that are only found in Pure Whitenol Serum are very effective and stand out from other brightening products as they inhibit melanin synthesis in the damaged basal layer of the skin and work in the complex mechanism of melanin synthesis that darkens the skin tone.

Product Info	
Size	50ml
Color	White
