I HYCOOX INJECTOR

Korea Multi Suction Auto-Sensing Injector for aesthetic

NOBAMEDI KOREA's HYCOOX multi suction auto injector brings a new world to the dermatologists. The majority of injectors are operated with a foot switch or trigger. However, HYCOOX is operated automatically via an auto-sensing suction system. "No need to use foot switch or trigger, after skin is sucked, solution will be injected automatically."

Features

- With NO need to use foot switch or trigger, after skin is sucked, solution is injected automatically.
- Could treat HYDRO Injection, Scalp Treatment, PRP Injection, LIPO, Filler, Toxin
- Low leakage, Low pain, Easy to learn and use
- You can choose the mode on the touch screen display, and can adjusted how many shots you would like to inject within certain syringe size and solution amount.
- You can control the level of suction, injection speed and viscosity.
- The way to use HYCOOX is easy and easy to learn how to use, so it's good for franchise business since the clients will be able to have same result from the doctor who uses HYCOOX.
