I Silicone for Personal Care

HRS Silicone for Personal Care

Silicone is widely used in personal care for its advantages, such as water repellency, lubrication, low surface tension, safety, great usability and application, gloss, great moisturizing effect, and nontoxic property. It can be applied for Skin Care / Cream, Lotion, Makeup / BB Cream, Lipstick, Hair Care / Shampoo, Treatment, Sun Care / Sun Cream, Sun Gel, Body Care / Body Lotion, Body Cream, and so on.

SILICONE OIL GRADE

Silicone oil used for cosmetics is normally transparent, odorless, and physiologically inert, making it highly secure for the human body.

SILICONE ELASTOMER GEL/POWDER GRADE

Low viscosity (volatile and nonvolatile) oil and Cross Polymer are fused together to make elastic silicone that brings cushioning.

SILICONE GUM (Dimethiconol) GRADE

Dimethiconol is a type of silicone, which is based on dimethylsiloxane, with a heavy molecular weight and a hydroxyl group at the end.

Used for wound healing and scar prevention, Dimethiconol is also FDA-approved as a component in over-the-counter drugs for skin protection.

Product Info	
Color	Transparent
Fuctions	personal care
MOQ	600 ea
INCI Name	Vinyl Dimethicone
Viscosity	100
Molecular Weight	7,500
Refractive index	1.404

I Company Introduction

Company Name : HRS Co., Ltd.

HRS CO., LTD. is a Korean chemical-listed company specializing in manufacturing silicone rubber. We are running an office in Seoul, Korea, two local plants (Pyeongtaek, Asan), and a plant in Suzhou, China. Since 1981, we have steadfastly researched and developed a single formula of silicone rubber to build our competitive edge in the silicone industry. For this R&D and sales effort, we have obtained 17 patent certificates.
