I Iris Pi Laser device

BLUECORECOMPANY Iris Laser device

IRIS is the first smart laser device to operate with a true 15 Hz repetition rate, enabling highly efficient performance in treating pigmented lesions by safely destroying pigments while minimizing the patient's pain.

<Dual Cooling System>

Our globally patented double cooling system allows for continuously stable energy over a long period.

<PTP Bluetoning Technology>

Bluetoning is a unique energy dispersion of 5:5, 6:4, 7:3, and 8:2 producing the best toning results for each skin type and user preference. The power control technology supports 15 Hz all the time without energy variation.

<Convenient Electrical System>

Iris electrical components come in a module type for faster servicing.

Product Info	
Size (mm)	(W)295 x (L)740 x (H)973
Weight	70kg
Power	220 ~ 230 VAC, 15A, 50Hz or 60Hz
HSK Code	9018.90.9080
Origin	Made in Korea
Price	EXW USD 50,000 / per unit
MOQ	2 ea

I Company Introduction

Company Name : BLUECORECOMPANY

Bluecore Company is a Laser medical device company that professionally develops and manufactures medical Laser products. In the development of Laser products, we design and develop all component parts such as optical, electronic, power, and mechanical design. Acquired intellectual property management certification in 2018 Korea Invention Promotion Association.
