## I Marksman MK-300K

### Stand alone Dot peen marking machine

Stand alone Dot peen marking machine MK-300K is designed for small quantities and various kinds of marking. The MK-300K has built-in controller inside of marking head as bench-top marking machine.

Can edit marking information with inbuilt keyboard or send it wirelessly to the marking head in seconds via Bluetooth and verify variable data and setting on the built-in liquid-crystal display (LCD).

It makes you have permanent marking on your parts without PC.

MK-300K works with parts of various shapes and surface conditions (flat and irregular surfaces, concave, convex, circular, raw material etc.) by high stroke marking pin.

Editing available with PC or Mobile application.

- PC: JS-2100 PC software
- Mobile application: JS-2200 mobile application via Bluetooth
