## I RIMAC Age-Returning Cream

### Placenta cream made in Jeju Island

RIMAC Age-Returning Cream is a natural moisturizing cream which has highly enriched Jeju placental protein and horse-oil. As an ingredient similar to human skin, it is rich in all of energies your skin needs. We use our unique fermentation technology to forward the placental protein of clean Jeju deep inside the skin. Forming a day-lasting skin barrier, it provides strong care to make your skin bright and silky from the moment you apply it.

#### Placenta from Jeju

The placenta protein ingredient processed directly from Jeju Island keeps your skin clean and shiny to make it appear healthier.

#### Horse Oil

Horse oil is known to contain large amounts of active ingredients that provide excellent care for skin vitality and help to moisturize skin.

#### Fullerene

Fullerene has been called as a “radical sponge” because it absorbs radicals from active oxygen.

- The raw materials used in the product came strictly from a single farm on clean Jeju Island (Pyoseon-myeon Farm, Seogwipo-si, Jeju-do, Republic of Korea)
- Conforms to the Ministry of Food and Drug Safety standards for functional cosmetics
- Human skin irritation test completed
- EU CPNP & UK SCPN registered products
