I TinyTAN MIC Drop 3D Light up case

Light up your phone with TinyTAN Light Up Case

SG DESIGN's Light Up Case is the world's first and only product that lights up when the phone receives phone calls, text messages, SNS alarms, beat of the music, etc.

- The whole back panel lights up for incoming alarms like calls, texts, e-mails, etc.
- **Easy settings** : Need only 30 seconds to set up LED lighting options.
- **Music detection** : When the music is played by your phone, the case detect the beat of music and emit light. (Use Music Strobe APP)
- **Motion recognition** : Recognizes the motion of users and lights up according to movement.

TinyTAN MIC DROP 3D Light Up Case.

I Company Introduction

Company Name : SG DESIGN

"Communicate with Lights"

SG DESIGN's Light Up Case is the world's first and only product that lights up when the phone receives phone calls, text messages, SNS alarms, beat of the music, motions, etc. SG DESIGN invented the new technology called 'lighting skin' to evenly light up the case utilizing 'LED Flash Alerts' function, which is a setting option provided in the device.
