I Garion 9, C-arm

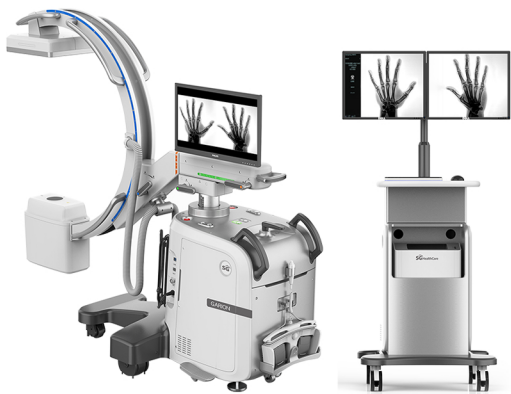

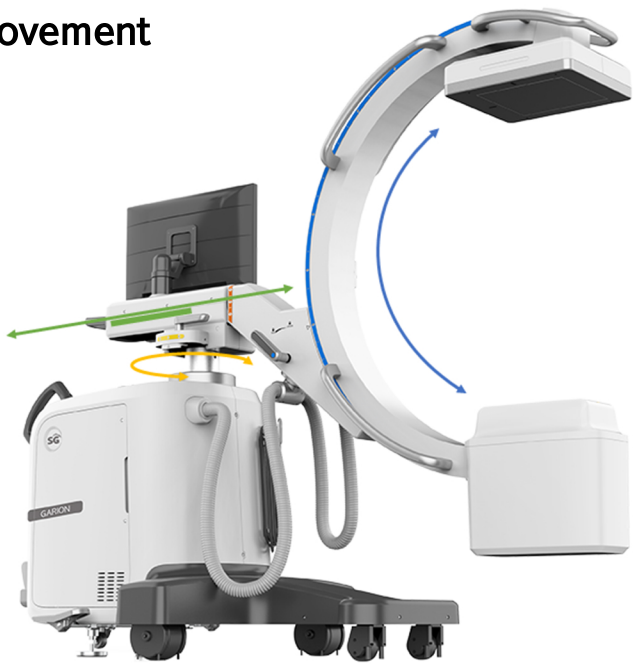

Digital surgery system

<Garion is a compact and versatile digital surgery system>

It is aimed to help you save, pace and improve work efficiency. It has minimal post-sales expenditures. Garion is equipped with a high resolution FPD. Its composition, along with other components such as positive/negative inversion, realtime zoom & rotation, as well as advanced noise reduction and optimized contrast/brightness, guarantees much clearer and enhanced image quality. These superb images are stably supported by the upgraded 40kHz high frequency generator, at a low dose. The combination of dynamic FPD means that Garion provides the highest quality on screen image. Our advanced image-processing technology enables you to utilize various functions such as an image flip (horizontal & vertical), image rotation (360 degree), real-time zoom, noise reduction, multiple display up to 2 x 2 matrix format, and real-time edge enhancement, etc.

Movement

Product Info	
Size (mm)	220 x 160 x 155 (cm)
Weight	300kg
HS Code	9022 14
MOQ	1 ea
Cpu	Intel i5 6GEN
MOQ	1 ea
monitor	19" / 1280 x 1024 pixels
